ACCESS HARDWARE SUPPLY

## Securitron BPS-12/24-1 True continuous duty power finally comes clean

Our new BPS-12/24-1 dual voltage power supply delivers all of the rugged performance you've come to expect from a Securitron power supply - and then some. By supplying a full 1 AMP of current available continuously at either 12VDC or 24VDC settings—even while charging batteries—the worries of under-powering a system are a thing of the past. Ultra-clean linear voltage output means the BPS-12/24-1 will never expose sensitive electronic components to noise or interference.

### Features and Benefits:

- Dual output field selectable-12 or 24VDC
- Full 1 AMP continuous current output even when charging back-up batteries
- AC failure monitoring with remote output
- Battery charging circuit completely independent of output
- UL Listed fire alarm release
- Current limited output complies with UL Class 2 requirements
- Capable of handling large short duration inrush currents with batteries installed

Output can be run at 12VDC while the charging circuit output produces 13.6VDC, keeping the batteries fully charged. The new AC failure monitoring function provides a form "C" dry contact which alerts the access or alarm system of an AC power failure to the BPS-12/24-1 – Securitron's cleanest linear power ever!
