

Integra 32 IRC-2000 Series Intelligent Controller

IRC-2000 Intelligent Controllers allow control of two access control points (doors). They utilize flash firmware for easy upgrades, and employ fully distributed intelligence for off-line operations. Decisions such as access level changes, schedule activation, and card expiration are made by an IRC-2000 controller without the need of a computer.

- 5,000 cardholder capacity, expandable to 8,000
- 3,000 event buffer
- Distributed architecture
- Built-in clock & calendar
- Updatable flash firmware
- 2 access points; 8 programmable inputs and outputs
- Supports RS-232, RS-485, and TCP/IP supervised communications
- Resettable fuse circuit protection

The IRC-2000 includes the controller, enclosure, and power supply.
