Each product on a contract order is automatically labeled with door number, keying information, and hardware set information. This information is placed on a special secondary label. There is no extra charge for this service.

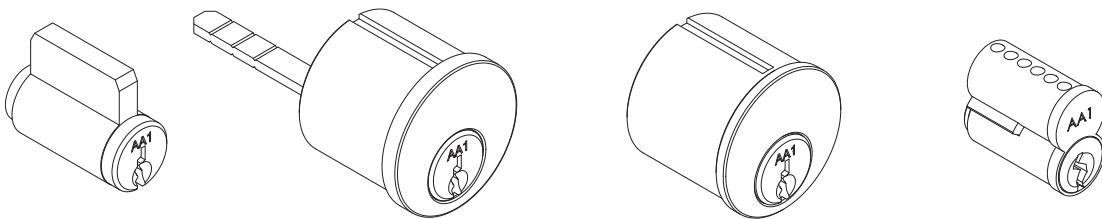

In addition to the secondary label, DORMA marks cylinders with their key symbol in a concealed location using a water-resistant marker. If the cylinder needs to be rekeyed, the marking can be rubbed off without damaging the cylinder.

We do not recommend permanent marking for cylinders, but if required, we can mark the cylinder in a concealed location with up to six characters, or in a visible location (plug or core face) with up to four characters.

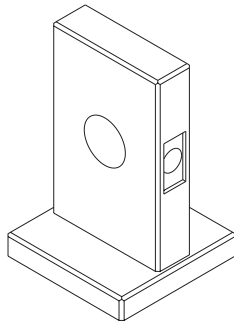

Permanent marking voids the warranty with regards to finish and adds \$5 list to the price of each cylinder. At this time, we do not offer marking in a visible location for Kaba cylinders.
