

## ... ELECTRIC STRIKE

### The HES 9400: The sleek, slim, surface-mounted solution

The logo for Access Hardware Supply (AHS) is displayed in a stylized font within a rectangular frame. To the left of the text is a vertical orange bar with several overlapping colored squares (green, blue, red, green, tan, orange) of varying sizes.

The HES 9400 electric strike is completely surface-mounted with a unique ½" slim-line design that is ideal for ½" throw rim exit devices in steel, aluminum or wood frames. It features an all new profile with a separate decorative cover that conceals the mounting screws, and offers a sleek surface for both superior looks and added strength.

The HES 9400 is UL 1034 listed, exceeds ANSI/BHMA Grade 1 standards and is fast and easy to install.

Strikes ship fail secure, but are quickly and easily converted to fail safe in the field by moving two selector stop pins located inside the strike body. Choosing the HES 9400 slim-line electric strike for use with ½" rim-exit devices means you get designer looks, easy installation and reliable strength.

Sounds like a smart solution to us.
