

The iCLASS® Key II

Access flexibility right on your key ring

The size of a typical automotive key, this credential form factor can be placed on a key ring or lanyard and customized for corporate identity and branding purposes. The molded plastic key fob is ideal for diverse applications including access control, network log-on security, parking applications, cashless vending, time, attendance and biometric verification.

HID's iCLASS 13.56 MHz read/write contactless smart card technology also supports future growth for an organization's credential program. The iCLASS Key II provides the convenience of an iCLASS contactless read/write smart card in a small molded plastic enclosure that is durable in harsh environments.
