Information Required Prior to Requesting Assistance

Your request for a BAA/ARRA Certification letter should include the following:

1. Project Name: _____

2. Solicitation # (if applicable): _____

3. Total Project Size (dollar amount): \$_____

4. Does the above project total size exceed the \$7.8 M threshold for BAA/WTO? Yes No

5. Does the above project total size exceed the \$9.1 M threshold for NAFTA? Yes No

6. Federal Project: Yes No

7. State Project: Yes - ST _____ No

8. City Project: Yes No

9. HUD Project: Yes No

10. US EPA Project: Yes No

11. ARRA Funded Project: Yes No

12. List of Specified Products (attach separate sheet if required)

Submit Completed form to: ST-GOVTSERVICES@IRCO.COM

Please note this is only a worksheet to help provide and gather all necessary information for Buy America Act certification.

This catalog contains products that currently comply with Buy American requirements imposed by the federal government through the Buy American Act (“BAA”) and the American Recovery and Reinvestment Act (“ARRA”) or meet a clear exception to these Buy American requirements. The catalog is reviewed and updated on a quarterly basis, to verify continued compliance. Please be sure to visit IR PartnerLink for the most current catalog revision.

It is our goal to make it as easy as possible to supply Ingersoll Rand Security Technologies products for projects subject to Buy American requirements. A brief description of some of the federal requirements can be found below. Please keep in mind that there are exceptions, exemptions and waivers to many of these requirements. Understanding all the factors that can affect a particular product or project can be confusing, which is why Ingersoll Rand Security Technologies has a Government Services team to assist you. We are often able to provide product solutions based on these factors. Please direct product or project related inquiries by contacting us at st-govtservices@irco.com

To obtain product certification forms, e-mail your request to st-govtservices@irco.com, and your request will be forwarded to the proper location.

All items in this catalog are subject to the prices, terms and conditions listed in the respective current product pricebooks.

What is the BAA?

The Buy American Act (BAA) establishes a preference for the federal government, when purchasing supplies for use in the United States, to purchase products mined, produced, or manufactured in the United States. For most products, the federal government has created a two-part test examining manufacturing and the cost of domestic components. First, under the basic standard established by the Comptroller General of the United States, manufacturing necessitates that the “completion of the [end product] in the form required for use by the Government be carried out domestically.” As an example, kits assembled and packaged in the United States can be considered manufactured in the United States even where individual components are manufactured in foreign countries. Second, more than 50% of the cost of the components of the end product must be mined produced or manufactured in the United States. However, where an end product being sold to the federal government is a commercially available off-the-shelf (COTS) item, meaning no modifications are made to the product for sale to the federal government, the components test is waived. Most Ingersoll Rand Security Technologies products are COTS items and exempt from the components test, products must be manufactured and assembled in the United States.

When could BAA apply?

The BAA applies to federal purchases exceeding \$3,000. However, established trade agreements with numerous countries set maximum thresholds for the application of the BAA when products from qualifying designated WTO countries are offered. When the construction project exceeds \$7,804,000, the federal government must give equal consideration to products substantially transformed in qualifying designated WTO countries. BAA does not apply to purchases made through U.S. General Services Administration Schedule contracts

What is the ARRA?

The American Recovery and Reinvestment Act of 2009 (ARRA) is an economic stimulus package that prohibits the use of funds for any project involving the construction, alteration, maintenance, or repair of a public building or public work (i.e. a dam or wastewater treatment facility) unless all of the iron, steel and manufactured goods used in the project are produced in the United States. Unlike the BAA, the ARRA is a one part test, “was the iron, steel or manufactured good” produced in the United States?” While the meaning of “produced” is not defined by statute or regulation, it is expected to be applied in a manner similar to the test for manufacturing under the BAA.

When Could the ARRA Apply?

Federal Contracts

The ARRA Buy American requirements apply to all federal contracts for construction, alteration, maintenance, or repair of a building. However, when the federal contract exceeds \$7,804,000 WTO-GPA and \$9,110,318 NAFTA products substantially transformed in qualifying designated countries must receive equal consideration. For example, Falcon Brand lock series B, Y, and W products are substantially transformed in Taiwan (a qualifying designated WTO country) and are, therefore, eligible for use on federal construction contracts exceeding \$7,804,000.

State Contracts

The ARRA Buy American provisions apply without limitation to contracts with the following thirteen states, when the state entity uses federal ARRA dollars to fund a construction project for a public building or public work:

Alabama	Indiana	New Mexico	Ohio	West Virginia
Alaska	Nevada	North Carolina	South Carolina	
Georgia	New Jersey	North Dakota	Virginia	

For contracts with the other 37 states, when ARRA dollars are used to fund the construction project, these states have agreed give equal consideration to products substantially transformed in qualifying designated countries, which includes Taiwan. Qualifying contract value must be \$7,804,000 or over.

At this time none of the 50 states recognize or have agreed to participate in the NAFTA Trade Agreement, which includes Mexican products.

Local Governments and Other Governing Entities

The ARRA Buy American requirements apply to cities and municipalities that contract using ARRA funds. For contracts the following entities, when ARRA dollars are used to fund the construction project, the entities must give equal consideration to products substantially transformed in qualifying designated countries, when the contract value exceeds \$7,804,000:

Boston, MA	Indianapolis, IN	Massachusetts Port Authority
Chicago, IL	Nashville, TN	Port Authority of New York and New Jersey
Dallas, TX	San Antonio, TX	Port of Baltimore
Detroit	Puerto Rico	

TAA - Trade Agreements Act establishes an exception to the Buy American Act (BAA) for end products produced or manufactured in the United States, or substantially transformed in the U.S. or designated end country into a new and different article of commerce with a different name, character, or use; distinct from which it was transformed, per Federal Acquisition Regulations (FARS). As with BAA, there are many exceptions to TAA that may apply.

What is World Trade Organization (WTO) Government Procurement Act? - WTO is an established trade agreement with numerous countries setting maximum thresholds for the application of the BAA when products from qualifying designated WTO countries are offered.

When could World Trade Organization (WTO) apply? - When contract value exceeds \$7,804,000, the federal government must give equal consideration to products substantially transformed in qualifying designated WTO countries. Established trade agreements with numerous countries set maximum thresholds for the application of the BAA when products from qualifying designated WTO countries are offered.

NAFTA - The North American Free Trade Agreement is a trade agreement in effect between the United States, Canada & Mexico. The NAFTA agreement provides for preferential tariff treatment for "originating" goods traded within the NAFTA region. Products originating in NAFTA countries may be eligible under the Trade Agreements Act (TAA) as an exception to BAA, based on specific dollar thresholds of \$9,110,310.00, and applies to Federal construction projects.

SPPA - Steel Product Procurement Act - (SPPA) is a Commonwealth of Pennsylvania requirement to aid and promote the U.S. steel industry. It gives preference to domestic products for Pennsylvania public works projects/buildings. Any construction project in Pennsylvania that uses state funding is subject to SPPA requirements.

Domestic End Product - A product that is 1) manufactured in the U.S. and 2) whose cost of components mined, produced or manufactured in the U.S. exceed 50% of the total cost of all components.

FARS - Federal Acquisition Regulations - A section of the U.S. Code of Federal Regulations detailing purchasing / procurement policies for the federal government.

DFARS - Defense Federal Acquisition Regulations - A section of the U.S. Code of Federal Regulations detailing purchasing / procurement policies for the Department of Defense (DoD).

Construction Project - Any federally funded new construction or renovation work involving a General Contractor is generally considered a construction contract. Often, the word "construction" is noted in the contract.

COTS - Commercially available Off The Shelf - Any item, other than real property, that is of a type customarily used by the general public or non-governmental purposes, and that 1) Has been sold, leased or licensed to the general public; or 2) Has been offered for sale, lease or license to the general public. Does not apply to Mexico end-products, as assembly and packaging is required in the United States.

February 16, 2010 - Canada and the United States have signed an agreement under which the United States has waived the Buy American provisions. Canadian companies can now participate in a number of infrastructure projects being funded under the Recovery Act. The agreement enjoys the full support of Canadian provinces and territories.

20-722-XP	L series Primus Core Adams rite 4070 series	Primus
20-723	Primus cyl for Yale 5300,5400,6200 knobs	Primus
20-723-XP	Primus cyl for Yale 5300,5400,6200 knobs	Primus
20-724	A series 20-724 Primus cylinder, non-Orbit	Primus
20-724	D knobs 6-Pin conventional cylinder, 2 1/2 thick door	Primus
20-724-XP	D knobs 6-Pin conventional cylinder, 2 1/2 thick door	Primus
20-726	Primus for Sargent 6 line	Primus
20-726-XP	Primus for Sargent 6 line	Primus
20-727	Primus cyl for Corbin Russwin CL3400,cl3600	Primus
20-727-XP	Primus cyl for Corbin Russwin CL3400,cl3600	Primus
20-728	AL series Primus Cylinder	Primus
20-728-XP	AL series 20-728 Primus cylinder	Primus
20-729	B250 series Primus Cyl Only	Primus
20-729	B100 series 20-729 Primus cylinder only	Primus
20-729-XP	B100 series 20-729 Primus cylinder only	Primus
20-731	B250, B400, Primus cyl less housing	Primus
20-739	Primus for Corbin Russwin CL3400, CL3600	Primus
20-739-XP	Primus for Corbin Russwin CL3400, CL3600	Primus
20-740	Primus Full Size IC core	Primus
20-740-XP	Primus Full Size IC core	Primus
20-741	Primus Full Size IC core less logo	Primus
20-741-XP	Primus Full Size IC core less logo	Primus
20-742	B761, B764 Primus	Primus
20-742-XP	B761, B764 Primus	Primus
20-743	B761, B764 Primus	Primus
20-744	B760, B763 Primus	Primus
20-744-XP	B760, B763 Primus	Primus
20-745	B762 Primus	Primus
20-745-XP	B762 Primus	Primus
20-746	B762 Primus	Primus
20-747	Primus cyl for Yale 5300LN,5400LN, 6400LN levers	Primus
20-747-XP	Primus cyl for Yale 5300LN,5400LN, 6400LN levers	Primus
20-748	D knobs Primus cylinder	Primus
20-748-XP	D knobs Primus cylinder	Primus
20-750	D Lever Primus cylinder	Primus
20-750-XP	D Lever Primus cylinder	Primus
20-752	S Lever Primus cylinder	Primus
20-752-XP	S Lever Primus cylinder	Primus
20-757	Exit device Interchangeable Core Rim Cylinders Primus	Primus
20-757-XP	Exit device Interchangeable Core Rim Cylinders Primus	Primus
20-763	Mortise Cylinders with Straight Cam for Exit Devices Primus	Primus
20-763-XP	Mortise Cylinders with Straight Cam for Exit Devices Primus	Primus
20-765	ND-Series Locksets Primus	Primus
20-765-XP	ND-Series Locksets Primus	Primus
20-766	Exit Device Full Size IC Primus core for Adams Rite MS4500, 4700 Lori 4500 and Corbin DL3000	Primus

The products listed meet the requirements of BAA on the published date of this catalog.
