

High Security Made Easy With Schlage

The logo for Access Hardware Supply (AHS) is displayed in a stylized font within a rectangular frame. The letters 'AHS' are in a bold, sans-serif font, with 'A' and 'S' in red and 'H' in white. The frame has a metallic, brushed metal appearance.

The M400 Series electromagnetic locks from Schlage are designed with the customer in mind to be robust, easy to install, and secure. The new bayonet mounting feature allows installers to have their hands free during the mounting process. All M400 Series electromagnetic locks are also non-handed and symmetrical, allowing optimum placement of the magnet regardless of the application.

M400 Series locks have automatic voltage sensing for 12 and 24 volts along with polarity protection to make wiring less complex, and all are tested and certified to meet or exceed UL 1034 and BHMA hold force requirements. Holding force ranges from 500 lbs. to 1,500 lbs.

Two configurations are available to meet specific needs: The M400 provides basic security, while the M400P provides intelligent sensing and reporting features needed to integrate with access control systems. Kits are available for top jam, double door, and glass door applications.

The Schlage logo is presented in a bold, blue, sans-serif font. The letters are white with a blue outline, and the entire logo is set against a dark blue rectangular background.
