SARGENT Announces UL 294 Certification for Harmony® Series Integrated Wiegand Locks

SARGENT is pleased to announce that the Harmony Series Integrated Wiegand locks have received UL 294 certification.

UL 294 is the Underwriters Laboratories (UL) standard of safety and performance for Access Control System units. It is a U.S. only system level certification that ensures access control products are suitable for all environments and will perform in the most adverse conditions. The UL 294 listing will be standard in all Harmony H1 (prox) and H2 (iCLASS®) configurations (mortise, cylindrical, and exit device).

For information regarding access control system compliance, please call 800-810-WIRE.

There is no change in pricing associated with this product enhancement. Beginning November 22, 2010, Harmony shipments will be UL 294 compliant.

The Authorized Channel Partner (ACP) program is open to distributors who sell ASSA ABLOY's technology products to security systems integrators and locksmiths, and help with product selection based on the application. The ACP program is for resellers that do not install and service products.

Please distribute this bulletin to everyone in your distributorship who specifies and/or purchases SARGENT Electronic Access Control products. Insert this bulletin and sell sheet in the Integrated Wiegand section of your SARGENT full line catalog. The updated Harmony catalog is available in the Partner Area on www.intelligentopenings.com.

For additional information, contact your ASSA ABLOY Door Security Solutions sales consultant, call SARGENT at 800-727-5477, or visit www.sargentlock.com.
