

Title:	Schlage Announces New Look for Primus ID Cards
Date:	2010/08/31
Product:	Key System ID Cards
Viewers:	All

Schlage is proud to announce a new look for the Primus ID cards. The new cards will replace the existing embossed cards and will function in a very similar manner. Schlage dealers will continue to use the ID Cards to ensure that only authorized individuals are allowed to obtain restricted keys for a given facility. To request additional keys, customers must present this ID card to their security professional and, in turn, they will compare the signature to the one on the card and verify they are permitted to purchase keys.

Why did we make the change?

Schlage stopped supplying the carbon copy forms a few years back and as a result, there was no longer a need to utilize the embossed (raised lettering and numbering) cards currently supplied. Since then, pdf form MS-E110 (see link to page below) has been posted on the Schlage website. The feedback from our customers indicates that this is a more convenient method for dealers to upload information, print or keep as an electronic file.
