\*Please reference [“While Supplies Last”](#) on Partner Link for more information for availability on Legacy product.

The CT5000 will be available *by early 2011*, please check for ship dates via Partner Link.

Please Be Advised:

*There are no commercially available keypads or readers that will work as direct replacement for this product line. It is for this reason that these products were designed to begin with. However a decision was made to discontinue these products as the supply chain for these units will no longer exist as the close of the Forestville, CT plant grows near.*
