

Super Tough Maglocks and Gate Locks

SECURITRON offers a comprehensive line of quality electromagnetic locks and accessories, including Magnalock Series maglocks and gate locks.

The popular **M68 Series 1200 lbs. Holding Force Magnalock** with automatic dual voltage offers a built-in wire access chamber and new bracket mount design for a unique method of installation. The M68 Series is recommended for interior and perimeter doors through which criminals could gain entrance to cause substantial economic loss. It features a patented instant release circuit and surface mounts easily using a minimum of tools. Lock options include door position switch, LED indicator and anti-tamper switch.

Another top seller, **The GL1 2000 lbs. Electromechanical Gate Lock**, is designed to secure vehicle and pedestrian gate applications where security and weather resistance are paramount. The GL1 functions equally well in both electrically and manually operated gate installations and can be used for swing gates, sliding gates, stock cage gates and more. The GL1 features automatic dual voltage, and operates with up to 100 lbs. of preload. Its tamper proof cast aluminum housing and hardened steel latch keep the bad guys on the right side of the gate.
