

Electromagnetic Lock Portfolio Update

The electromagnetic lock portfolio is in the process of being redesigned to build upon the success of the current product line. We are taking the best of the previous Von Duprin and Schlage lines, and using inputs from VOC to improve functionality, increase simplicity and make installation easier.

While price details are not yet ready to be released, we do want to help you plan for the transition as efficiently as possible. Therefore, detailed product specification will be available on PartnerLink by end of April. The new SKU's are planned to be available for order placement and shipping during Q3 of 2010. We anticipate details regarding price and exact timing, to be ready for release in the June/July timeframe. The current SKU's continue to be available for order placement through Q3 and available while supplies last in Q4.

Features being addressed in the redesign:

- Easier installation – bayonet mounting bracket eliminates holding lock while installing mounting screws
- Easy to stock – basic or plus feature bundles, common PCB's
- Non-handed – right or left hand installation, field configurable
- Single door mag locks can be easily converted to double door with a unique bridge component
- Superior dove tail design for maximum hold force (uses former Von Duprin design)
- Improved MBS (magnetic bond sensor) performance
- As before, locks will have automatic voltage selection for 12/24V with polarity protection

Electromagnetic Locks Replacement Outline

Current Portfolio	New Portfolio	New Portfolio Options
320+ RTD, ATS, LED, DSM, MBS Options	M420/M422 Meets or exceeds 500lb BHMA hold force rating	Basic Option – AVS Plus Option – DSM, MBS, RTD, LED, ATS
350+ RTD, ATS, LED, DSM, MBS Options	M450/M452 Meets or exceeds 1000lb BHMA hold force rating	
390+ RTD, ATS, LED, DSM, MBS Options	M490/M492 Meets or exceeds 1500lb BHMA hold force rating	
390DEL RTD, ATS, LED, DSM, MBS Options	M490DEL Meets or exceeds 1500lb BHMA hold force rating	
390G DSM, MBS Options	M490G Meets or exceeds 1500lb BHMA hold force rating	DSM, MBS Standard
GF3000 RTD, DSM, MBS Options Meets or exceeds 1500lb BHMA hold force rating	Remains Unchanged Simplified option packages	Basic Option – AVS Plus Option – DSM, MBS, RTD
320M DSM, MBS Options Meets or exceeds 500lb BHMA hold force rating	Remains Unchanged Single option package	DSM, MBS Standard
40 Series Meets or exceed 500lb BHMA hold force rating	Remains Unchanged	DSM, MBS Standard
70 Series Meets or exceeds 1000lb BHMA hold force rating	Remains Unchanged	DSM, MBS Standard
