Listings

UL Certified ANSI/BHMA A156.3, Grade 1, Type 25

UL Listed for 3-hour Fire Rating on Metal Doors

UL Listed for 1-1/2 hour Fire Rating on Wood Doors

UL Listed for 20 minute Fire Rating on Wood Doors with BFB

Benefits

- **Fully Automatic:** Opening active door retracts top and bottom bolts. Closing active door extends top and bottom bolts into frame and sill strikes, locking inactive door.
- **Easy Ordering:** Packaged as a complete set to be installed in a recessed or flush metal door, or wood door.
- **Non-Handed:** It is not necessary to reverse either top or bottom bolt.
- **Override feature:** Prevents damage to doors or bolts should the bolt heads be prevented from entering top or bottom strike.
- **Low Closing Force:** ADA Compliant. Patented free-floating cams with a swivel face to accommodate for beveled doors.
- **Identical Prep:** Only a latch bolt prep creating a consistent appearance throughout the building.
- **Adds Stability to Wood Door:** Eliminates the core removal at the corner preventing delamination and or breakage.
- **Stock Finishes:** Available in all architectural finishes.
- **Made in the USA:** Manufactured and Assembled in the USA.

Universal Frame Prep Kit

The 8900 Universal Flush Bolt Strike Kit offers a retrofit plate and two reversible strike plates for both the 3/4" and 1-1/2" backsets. It eliminates the guesswork of which backset is specified and allows for an easy retrofit. Electro-zinc coated steel plates.

8900-EZ Set includes Retrofit Plate and Two Reversible Strike Plates

8900/25-EZ Supplied in a 25 pack
