### Handing:

- Latchbolt (as required)
  - Insert a flat blade screwdriver into cover slot
  - Pull back on screwdriver until latchbolt extends past the base front
  - Rotate head to desired position
- Hubs (as required)
  - Locate the red mark on locking piece
  - The red mark indicates the locked side
  - Push toggle button to the "Unlock" position
  - With a flat blade screwdriver push red mark on locking piece to rotate locking piece 180° to the desired location
  - The locking piece must be fully rotated 180° for proper operation

All existing Yale trims and cylinders will retrofit with mortise lockbodies shipped both before and after February 1, 2012. Armor fronts for mortise lockbodies shipped before February 1, 2012, will remain available as inventories allow.
